

PRESS RELEASE

AiDi Corporation Promotes “One-Stop Factory” at FTTH 2008

Emeryville, CA, September 17, 2008 – AiDi Corporation invites visitors to their booth at the 2008 FTTH Conference & Expo, to be held in Nashville, Tennessee, from September 22 – 24, 2008. AiDi Corporation will be promoting their “One-Stop Factory” solutions, including PLC splitter, MPO-LC fanout, CWDM MUX/DMUX, and DWDM MUX/DMUX component and module product lines. Modules can be LGX style, thin cassette style, or ultra-compact form factors, and are customizable.

The “One-Stop Factory” concept refers to AiDi’s vertically-integrated manufacturing line, which produces optical subcomponents, components, and modules. This greatly simplifies the supply chain and keeps AiDi’s prices low. As a single point-of-contact turnkey solution, AiDi also saves customers’ overhead costs by eliminating the need for managing multiple vendors and long lead times due to consignment logistics.

Other products include the recently released fiber optic ribbon hermetic feedthrough assemblies, Fiber Arrays, PMFA, V-Groove Arrays, Connectorized Patchcables and Fanout Assemblies, and the rest of the PLC Splitter product line. Marketing services and advanced technical services are also available.

To find out more about AiDi Corporation’s entire product and service portfolio, visit Booth #722 at FTTH 2008 in Nashville, Tennessee from September 22 – 24, 2008.

About AiDi Corporation

AiDi Corporation is a global company that offers innovative, high-value, Passive Optical Network (PON) products and service. AiDi leads the way to expanding optical network markets and deployments through improved network efficiency and economics. AiDi has exceptional technical leadership in the industry, providing customers with advanced networking options at a lower total cost of ownership. PON components from AiDi are remarkably well suited for harsh environments, as well as highly populated urban centers. All AiDi products are carefully engineered and manufactured to exceed industry standards, resulting in a higher standard for durability and a longer lifetime in the field. The company is privately held, founded by industry pioneers with several U.S. and International Patents Pending. AiDi headquarters is in Japan, with independent operating subsidiaries in China and the United States. All Rights Reserved.
